Internship – The Red Hat JBoss Quality Engineering Team

Red Hat JBoss Quality Engineering team is looking for students interested in Java EE. They will focus on testing of EAP product: JBoss (Wildfly) application server, covering all Java EE 6 and 7 features. They will write testing applications and test scenarios in Java to test functionality of its features. We will help them to learn and adapt clean code principles in their code. Last, but not least, we will help them to get acquainted to Java EE, many various tools and other languages we use: Gitlab, JUnit, Arquillian, bash to name a few.

Responsibilities:

- Analyze and solve given tasks
- Develop new features, fix bugs, do root cause analysis
- Test newly added features

Requirements:

- Student in an Information Technology related area or enthusiast for Java EE.
- Java SE programming skills
- Eager to continuously learn new technologies
- User level experience with Linux is benefit
- Professional communication skills
- Familiarity with open source projects is beneficial

Send your applications with enclosed CVs in English to Tereza Ticha at tticha@redhat.com. Please name email “EAP QA Intern”.
