Internship – File Systems Performance

Red Hat QE team is looking for a student interested in performance testing, to help us design and improve our testing workflow. You will learn how to work with file system benchmarking and storage technologies like XFS, ext4, LVM, LUKS, and several others. You will have an opportunity to work on real-life complex issues of file system performance. In the beginning we will teach you all necessary skill, so it is NOT necessary to know everything.

Responsibilities:

- Analyze the tests results
- Develop new test cases, maintain current tests

Requirements:

- Student in an Information Technology related area
- Eager to continuously learn new technologies
- User level experience with Linux
- Scripting experience in Shell
- Scripting experience in Python
- Communicative level of English
- Familiarity with open source projects is a plus

Send your applications with enclosed CVs in English to Tereza Ticha at tticha@redhat.com. Please name email “File Systems Performance Intern”.
