## Internship – Logging Infrastructure

Red Hat Security Engineering team is looking for a student interested in distributed applications and big data technologies to help us design and improve our effort to collect and analyse system logs in cloud environment. You will learn how to work with **OpenShift**, **Elasticsearch**, **Kibana**, and several others. You will have an opportunity to work on real-life complex issues of our products. You will have a chance to work with skilled engineers every day.

### Responsibilities:

- Analyze and solve given tasks
- Develop new features, fix bugs, do root cause analysis
- Test newly added features

### Requirements:

- Student in an Information Technology related area
- Python, Java, or JavaScript programming skills
- Eager to continuously learn new technologies
- User level experience with Linux
- Scripting experience in Shell
- Communicative level of English
- Professional communication skills
- Familiarity with open source projects

---

Send your applications with enclosed CVs in English to **Tereza Ticha** at [tticha@redhat.com](mailto:tticha@redhat.com).  
Please name email "Logging Intern".
