## Internship – Kernel QE, Storage

Red Hat QE global team is looking for a student interested in testing storage technologies like iSCSI, FC, LVM or Multipath. You will have a chance to help us design and improve our testing workflow, work with GIT and other tools our team use, or work with the latest hardware. We will try to let you work on the task in which you are most interested in.

### Responsibilities:

- Analyze and solve given tasks
- Writing and executing tests on Fedora, RHEL
- Test automation

### Requirements:

- Student in an Information Technology related area
- Scripting programming skills (eg. Bash, Python, Perl...)
- Eager to continuously learn new technologies
- User level experience with Linux
- Communicative level of English
- Familiarity with open source projects is a plus

---

**Send your applications with enclosed CVs in English to Tereza Ticha at [tticha@redhat.com](mailto:tticha@redhat.com). Please name email "Kernel QE Storage".**
