Internship – OpenStack Integration

Red Hat Engineering team is looking for a student interested in Cloud technologies to help us with OpenStack and CloudForms product integration. You will have an opportunity to work on real-life complex issues of our products and their integration via REST APIs. You will have a chance to work with skilled engineers every day.

Responsibilities:

- Analyze and solve given tasks
- Develop new features, fix bugs, do root cause analysis
- Test newly added features

Requirements:

- Student in an Information Technology related area
- Eager to continuously learn new technologies
- Ruby language programming skills
- Familiarity with web technologies
- Basic Linux administration and networking knowledge
- Communicative level of English
- Familiarity with open source projects

What we offer:

- Both maintenance and putting latest low level enhancements into production
- Improving complex continuous integration suite
- Product performance and scalability evaluation.
- Analysis of customer issues
- Work on alternative modern UIs and tooling

Send your applications with enclosed CVs in English to Tereza Ticha at tticha@redhat.com. Please name email "OpenStack Integration Intern".
