Internship – PlatformDev-CoreServices

Red Hat Engineering team is looking for a student interested in Linux application development. Intern will work on the core services of GNU/Linux operating system, will help senior developers with their “backlog” and “nice to have” tasks. Will propose the fixes upstream, work, communicate with the upstream developers. You will have a chance to work with skilled engineers every day.

Intern will help senior developers with their “backlog” and “nice to have” tasks. Will propose fixes upstream, work on their inclusion in upstream projects. Ideal candidate has some experience with Linux OS (at least as poweruser, managing his own Linux system), good knowledge of C/Python, experience with larger projects and open source projects is a plus.

Responsibilities:

- Analyze and solve given tasks
- Develop new features, fix bugs, do root cause analysis
- Test newly added features

Requirements:

- Student in an Information Technology related area
- C programming skills
- Eager to continuously learn new technologies
- User level experience with Linux
- Scripting experience in Shell
- Communicative level of English
- Professional communication skills
- Familiarity with open source projects

Send your applications with enclosed CVs in English to Tereza Ticha at tticha@redhat.com.

Please name email “PlatformDev-CoreServices”.
