Internship – PnT DevOps

At Red Hat, we connect an innovative community of customers, partners, and contributors to deliver an open source stack of trusted, high-performing solutions. We offer cloud, Linux, middleware, storage, and virtualization technologies, together with award-winning global customer support, consulting, and implementation services. Red Hat is a rapidly growing company supporting more than 90% of Fortune 500 companies.

Red Hat's DevOps team is seeking a Software Engineer - DevOps Automation and Quality Engineering to join us in Brno, Czech Republic. In this role, you will be responsible for testing and automating web applications and tools used by our Release Engineering team. You'll need excellent automation technical skills and the ability to adapt to a growing and evolving team. We'll need you to be flexible with the initiative to speed quickly with new technologies.

Responsibilities:

- Review functional specifications, release work flows, and test cases to understand the functional and technical requirements
- Design, develop, and maintain scripts for automation of the Red Hat's release pipeline and other tools
- Design, develop, and maintain test automation scripts and plans, write test cases, test bugs, and automate bug reproducers
- Participate in the continuous improvement and optimization of the test automation model
- Review test case design, testing schedule, and control worksheets

Requirements:

- Knowledge of an interpretive language, e.g. Python
- Power user of Linux
- Experience with IT automation tools, preferably Ansible, is a big plus
- Testing experience in automation web application testing and experience with automation testing tools are a big plus
- Interest in testing and examining how things work internally
- Ability to coordinate and help others solve difficult problems
- Fluent verbal and written English skills

Send your applications with enclosed CVs in English to **Tereza Ticha** at tticha@redhat.com.

Please name email "PnT Devops".
