## Internship – RHVM-QE (Virtualization)

Red Hat Virtualization team (oVirt) is looking for a student interested in various technologies(Linux/oVirt/Python scent of UI/Storage/Network) to help us design and improve our testing coverage. You will learn how to work with bug-reporting SW, versioning control system, testing suite, also how to write neat code plus various others. Also how to work inside real team. You will have an opportunity to work on real-life complex issues of our products. You will have a chance to work among great professionals on daily basis.

### Responsibilities:

- Analyze and solve given tasks
- Develop tests for new features, report & verify bugs
- Test assigned features

### Requirements:

- Student in an Information Technology related area
- Python programming skills
- Eager to continuously learn new technologies
- User level experience with Linux
- Scripting experience in Shell
- Basic level of English is acceptable
- Familiarity with open source projects is an advantage

---

**Send your applications with enclosed CVs in English to Tereza Ticha Tereza Ticha at [tticha@redhat.com](mailto:tticha@redhat.com). Please name email “RHVM-QE”.**
